

```
PS C:\Users\Abdulqadir Abuharrus> Hello...
```

Written in Markdown, rendered by Marp.

## Quick Refresher

- I'm Abdo!
- System Analyst Co-op on the *CATS* team!
- From BCIT's CST program.

## What I've worked on

- Written over 13 programs & scripts, including one for DocAlPrt and a ticket scraper for ServiceNow.
- Generated many CAIS reports from SQL queries and scripts
- Updated legacy scripts for new Active Directory policies
- CAIS user provisioning
- Wrote documentation and guides for future co-ops

## Growth

- PowerShell scripting
- Active Directory and user management
- Improved my SQL skills (much to be improved...)
- Maintaining productivity in WFH setting.
- Getting into habit of documenting my work.

## Highlights

- Our little in-person Monday huddles.
- Very talented team members that are always keen on helping and teaching.
- Tanico's cheeseburgers, seriously. 10/10 Can't recommend enough.

## Suggestions (*nitpicking tbh*)

- Give co-ops a chance to lead a mini project, perhaps?
- Ask co-ops to write out their goals in their role early on, helps keep them motivated.

Goodbye :(

It was great, so thank you.
